

MY LITTLE PUB

YOUR PERSONAL LITTLE PUB

Your Little Pub is more than a 'pub' in your backyard. It's a place to escape the day-to-day, one that naturally brings people together. A place to host, celebrate, unwind, and share stories. It quickly becomes the meeting point for family and friends, and the centre of many good times.

Every Little Pub is personalised to reflect you. Whether you dream of a Little Irish Pub, a Little English Pub, or something entirely your own, your space is designed around your taste, your story, and how you like to entertain.

Inside, it's all about the atmosphere and attention to detail, from the bespoke joinery right down to the brass coat hooks. On the walls and shelves, between the hand-picked memorabilia, hang your historic family photos, making it a fitting place to bring your friends and family together to share stories and reminisce.

Your Little Pub sits only a few steps from your home, but once inside, you feel transported. The outside world fades away, replaced by the cosy buzz of a pub enjoyed with your nearest and dearest.

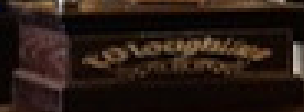

Life's too short not to enjoy it in your very own Little Pub, built for generations.

WHY MY LITTLE PUB?

Quality, attention to detail and service are incredibly important to us and you can trust us to deliver.

Every element of a Little Pub is precisely specified. Layouts, proportions, and materials have been tested and refined through extensive development to ensure each space functions and feels like a true pub.

Atmosphere is key.

Each Little Pub is filled with bespoke joinery, crafted especially for you and your Little Pub. Each one is made by Master Joiners in partnership with top of the line technology and machinery using the finest materials. And don't forget about the handpicked selection of memorabilia carefully positioned on the walls and shelves.

We are passionate about ensuring your Little Pub is perfect, right down to the little details. That we can promise.

PREPARATION

Foundation

In most cases, a simple pile foundation with timber bearers is sufficient to support your Little Pub. We will provide detailed specifications for your local builder to complete these works before delivery. Additionally, it is worth considering an adjacent outdoor area or timber decking to enhance the space and create a seamless extension of your pub.

Electrical

Standard Little Pubs are powered by an external single-phase 230V, 16-amp caravan connection. Your local electrician can prepare for this in advance, making it a simple plug-and-play setup upon arrival.

If needed, we can also provide a draw wire, allowing the Little Pub to be hardwired.

Each Little Pub comes with a Warrant of Electrical Fitness.

Delivery

The Little Pub arrives to your address on the back of a truck and we can assist with either a Hiab or appropriately sized crane to position it to where you need. Within a couple of hours your Little Pub will be ready for action.

And don't forget - if you decide to move house, you can pick it up and take it with you!

Lead Time

Lead times are subject to availability.

Production slots fill fast - we will let you know current availability during the proposal stage and give you an opportunity to pre-book a production slot.

Please contact us to confirm the next available delivery slot.
